* FOD (Foreign Object Detection) is a security guarantee for a wireless charger. The wireless charging system can detect if a foreign object, e.g. metal, is on the charging surface. In this case, the charging process is stopped or not started. If there is a foreign object on the charging surface remove it and restart the loading process.

Compatibility

The 3-in-1 foldable charging station is compatible with the Apple Watch and AirPods, and with iPhone models that support MagSafe.

Instruction

1. Set up the charging station.
2. Unfold the charging station.
3. Turn the iPhone charging surface to the required angle.

2. Connect the charging station to a USB Type C adapter with the included USB Type C cable.

3. Now place the devices that need to be charged on the charging station. With the 3-in-1 charging station MagSafe compatible iPhone models, Apple Watch and AirPods can be charged simultaneously. The charging station automatically detects the placed device. The inductive charging process starts automatically.
